**A message from Chair, Board of Management Clinical Training Center & Sharjah Surgical Institute, Vice Chancellor, Medical and Health Sciences Colleges, Dean of the College of Medicine**

I would like to seize this opportunity to thank all the Partners, Organizers, Participants and Clinical Training Center and Sharjah Surgical Institute, University of Sharjah during the months of March and April, 2023.

It is our mission to provide wide range of facilities and programs that enhance the training experience. I sincerely hope to see all our Partners, clients and Participants in the future as well and get benefit from Hands-on experience, knowledge and experience.

Enjoy the newsletter and stay safe

Prof.Qutayba Hamid

**A message from Director of Clinical Training Center & Sharjah Surgical Institute**

Welcome to the CTC newsletter for March and April, 2023, where we reflect on our activities held during the last two months.

At CTC our goal is to provide outstanding clinical and surgical training for health care professionals as the beacon of surgical and clinical training in UAE, GCC and MENA region.

This center of excellence aims at advancing the surgical and medical professional education through upskilling of health professionals to improve their clinical competence and patient care leading to better patient safety.

Prof.Nabil Sulaiman

# BASIC & ADVANCED LIFE SUPPORT COURSES

CTC & SSI is the authorized American Heart Association Training Center in UAE and has been successfully conducting the life support courses since many years.

A total of 34 courses were conducted for BLS and ACLS. whenever an emergency arises.

# TRANSANAL MINIMAL INVASIVE SURGERY COURSE (TAMIS) 6th MARCH 2023

During the course A transanal rectal excision with a transanal minimally invasive surgery (TAMIS) platform was performed on an unconscious animal with a posterior rectal adenoma. Electrocautery was used to begin the dissection taking the mucosa down to the sphincter muscle and advancing left to right to remove the lesion from the left posterior part of the sphincter muscle. Once the anal ring was passed the TAMIS platform was set up. The remainder of the resection was completed with the TAMIS platform using electrocautery on scissors.

# 6th HANDS ON MINIMAL INVASIVE SURGERY IN PEDIATRIC UROLOGY

## 9th & 10th MARCH 2023

IN COLLABORATION WITH:

This 2 days course provided a theoretical update on the most recent development of neonatal endoscopy and intensive experimental sessions ( Hands-on session) using small animals for surgical procedure.

A few of the topics that were covered in this workshop were: Ergonomics and installations, Introduction and positioning of trocars, Creation of a working space in the abdomen and chest, instruments and energy devices, Dissecting, suturing and knotting simple, sliding knots and continuous and backhand stitch.

# BARIATRIC SURGERY COURSE

## 12th MARCH 2023

Gastric bypass and other weight-loss surgeries – known collectively as bariatric surgery – involve making changes to your digestive system to help you lose weight. This one day workshop used animals for surgical procedures

IN COLLABORATION WITH:

*Johnson & Johnson*

# ANIMAL LAB WORKSHOP

## 16th MARCH 2023

IN COLLABORATION WITH:

مستشفى توام  
TAWAM HOSPITAL

# FOOT AND ANKLE TRAUMA SURGICAL APPROACHES

## 17th MARCH 2023

IN COLLABORATION WITH:

This One-day course covered the most recent developments and cutting-edge techniques in foot and ankle conditions. They include common injuries, adult flat foot, Hallux valgus and joint arthritis. With just a few systematic and keynote lectures to spark discussions, the course was highly interactive, involving participants in case-based presentations.

## CORE SKILLS COURSE

18th to 19th MARCH 2023

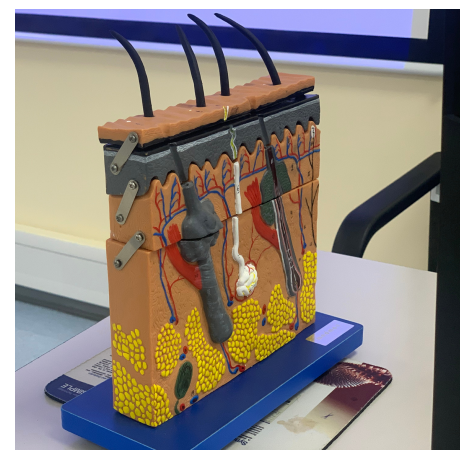

This intensive course covers the core laparoscopic surgery skills and knowledge essential for every surgical discipline. The participants used a range of high-quality laparoscopic equipment working with specifically designed bench top models, as well as learning a variety of knotting and suturing techniques.

## ADVANCED AESTHETIC MEDICINE COURSE

20th to 21st MARCH 2023

Mastering The Advanced Certificate of Aesthetic Medicine is designed to meet the needs of medical practitioners who are interested in increasing their clinical knowledge in aesthetic principles and the safe practice of latest evidence-based aesthetic medicine procedures. The two-day face-to-face course combines interactive lectures, case discussions, live demonstrations, and practical sessions.

# MINIMAL INVASIVE SURGERY FELLOWSHIP

## 29th MARCH 2023

# 38TH INTERCOLLEGIATE BASIC SURGICAL SKILLS

## 4th to 5th APRIL 2023

## MoU SIGNING BETWEEN JAHEZIYA AND CTC & SSI 4th APRIL 2023

Memorandum of understanding was signed between 'JAHEZIYA' and CTC & SSI. The partnership will extend support to the society by making the healthcare professional ready and prepared for the foreseen situations such as natural, chemical or biological disasters.

We are excited to announce partnership with Jaheziya (Emirates Center for Disaster Medicine) that is pioneering in emergency and disaster management courses for the healthcare professionals.

Clinical Training Center & Sharjah Surgical Institute will set up an office within the center to run these courses and give the highest quality of training to the professionals.

# BASIC DISASTER LIFE SUPPORT COURSE

## 11th TO 12th APRIL 2023

The first course of Basic Disaster Life Support was conducted with participants from different hospitals, students from within the university and participants from non-medical background who were interested to be part of such great initiative.

The course was a mixture of lectures, case studies and evaluations. Then going ahead with the field hospital that was set up with in the vicinity of the university to recreate an emergency or disaster situation, were the participants were coached to deal and be prepared for such disasters.

# CMR SURGICAL TRAINING WORKSHOP

## 18th to 19th APRIL 2023

The workshop conducted by CMR surgical during this month had the use of "Versius" robotic arm. It is built for precision, dexterity and versatility, Versius has been specifically designed to meet the needs of patients, surgeons and the surgical team. By providing minimal access surgery with enhanced accuracy and control for complex procedures, Versius helps surgeons and surgical teams to deliver high-quality surgical care.

CMR Surgical conducts their trainings and workshops almost every month in order to provide up to date trainings to the healthcare professionals using the CTC & SSI state of the art facility.

**In partnership with:**

# ADVANCED LIFE SUPPORT IN OBSTETRICS

## 29th APRIL 2023

The Advanced Life Support in Obstetrics (ALSO) program is highly structured, evidence based, one day course designed to provide healthcare professionals with the knowledge and skills to manage the emergency conditions that can occur during childbirth.

This course was conducted by Dr. Rabiah Noueihed, it had a group discussion, case study presentation and as well as hands-on on manikin and reconstructed scenarios.
