SDG 7.4.1

7 AFFORDABLE AND CLEAN ENERGY

Local community outreach for energy efficiency

The University of Sharjah is committed to promoting sustainability awareness and encouraging responsible energy consumption within the wider community. Through educational initiatives and community engagement activities, the University provides opportunities to learn about renewable energy and its importance in supporting sustainable development. This commitment is further reflected in the University's Sustainability with Community Engagement Policy (SUS-16), which encourages continuous sustainability awareness through community partnerships, educational workshops, and training sessions. The policy also addresses the importance of reducing electricity consumption and promoting responsible resource utilization.

Renewable Energy Awareness Session for School Students and Parents

On May 18, 2025, the Department of Sustainable and Renewable Energy Engineering (SREE) at the University of Sharjah organized an introductory online session for prospective school students and their parents to raise awareness of renewable energy engineering and the opportunities available in the field.
The session was led by Prof. Abdul Hai Alami, Chairman of the SREE Department, who introduced the Sustainable and Renewable Energy Engineering program and discussed educational and career opportunities in the renewable energy sector. Alumni Eng. Ahmed Alheloo and Eng. Arwa Fikri also participated, sharing their professional experiences and insights into the field. The session provided an opportunity for students and their families to engage with academic experts and industry professionals and gain a better understanding of renewable energy engineering and its applications.
