

Methodology

The study conducts survey on random national sample to determine the level of awareness of UAE youth in cybercrime field.

Project Objectives

- The project formulates a cybercrime protection mechanism for the purpose of protecting youth against potential risks of cybercrimes.
- Create cybersecurity awareness platform that targets the youth in UAE.
- Enhance the knowledge of UAE community in UAE law for cybersecurity and cybercrime.

Potential Impacts

- **Government Level:** deploy a framework that reflects the UAE laws for cybercrimes to enhance and increase the community awareness.
- **Community level:** raise awareness among youth about online threats and challenges and promote a safe and constructive use of the internet.
- **International Level:** contribute to the Global Cybersecurity Index (GCI), which is an initiative of the International Telecommunication Union (ITU) to measure the commitment of countries in order to raise cybersecurity awareness. The aim of the project is to increase the rank of the UAE to be one of the top countries in cybersecurity awareness.
- According to the results an adapted cyber security awareness **web platform will be developed.**
