Meeting overview:

The Basic Medical Sciences Annual Meeting program will cover the latest scientific discoveries across the spectrum of cancer research, diabetes mellitus, and cardiovascular diseases- ranging from the in vitro and in vivo or its association with COVID-19 and up to its application in the translational research. This event will be highlighting the latest research work of the faculty members and graduate students affiliated with the College of Medicine, University of Sharjah.

Meeting aim:

- To showcase our recent scientific discoveries in the field of basic medical science research
- To enhance interaction amongst the researchers in the Medical campus
- To facilitate national collaborations by inviting researcher from other medical schools in the UAE
- To provide a platform for senior graduate students to present their work
- To disseminate the latest and up-to-date findings in the field of basic science research
- To inspire faculty members, researchers, and graduate students by sharing success stories
