REVIVE does not exist in the market. I am very proud of my students (Noura Almannaai, Maryam Aldhanhani, and [shaikha ahmed](#)) performed their graduation project at the College of Pharmacy of [University of Sharjah](#) and prepared cream cosmetic products.

They conducted a formulation study where they determined the Minimum Inhibitory Concentration (MIC) for different preservatives and used optimum type and concentration accordingly in the cream. Their rational approach in formulation design supports product safety and sustainable product design. In addition, they selected jars, and created a brand name, logo, and label after confirming its validity with authorities

Thanks to Dr. [Mirhan Mostafa](#), Dr. Shijna and Dr. Ghalia for their support in the study.
