Work experience

Firstly, during my master I gained experience with photoenergy usage and its applications in combating pollutants, using UV-Vis spectrophotometer, spectrofluorophotometers, and TOC (total organic carbon analyser) as detecting tools.¹

Secondly, at NIOF I was working at detection of organic pollutants using GC spectrophotometers for detection of such pollutants.²

I did my PhD under the supervision of Prof. Rob Capon (University of Queensland, Australia), my PhD focused on isolation and structure elucidation of cytotoxic compounds from marine organisms, using a variety of instrumentations such as HPLC, NMR and LC-MS.^{3, 4, 5}

Currently, I am working as assistant professor at The University of Sharjah, UAE.
