

Curriculum Vitae

Prof. Dr. Soliman Awad Mahmoud

IEEE SENIOR MEMBER

1. Personal Information

- ◆ Date of birth: 27 / 9 / 1971
- ◆ Place of birth: Cairo
- ◆ Nationality: Egyptian
- ◆ Marital status: Married
- ◆ Address: 120B street # 6 El Mokattam, Cairo, Egypt
- ◆ Phone: (+202)5071867-(+2012)3181807-
(+97150)6340596- (+9716)5053934
- ◆ E-mail: solimanawad@gmail.com;
solimanm@sharjah.ac.ae
- ◆ Author Scopus ID: <https://www.scopus.com/authid/detail.uri?authorId=7202300093>
- ◆ Author ORCID ID: <https://orcid.org/0000-0003-0581-1796>
- ◆ Author WEB OF SCIENCE ID: <http://www.researcherid.com/rid/F-2637-2012>
- ◆ Author Google Scholar Citations: <https://scholar.google.com/citations?hl=en-US&user=8kFw2RsAAAAJ>

2. Education

B.Sc. Electronics and Communications Dept. July 1994

- ◆ University: **Cairo University**
- ◆ Faculty: Faculty of Engineering
- ◆ Major: Electronics and Communications
- ◆ Duration: 1989-1994
- ◆ Appreciation: Distinction with honor degree
- ◆ GPA: 3.8/4
- ◆ Rank: Top 1% of a class of 200 students
- ◆ B.Sc. score: 94^o%
- ◆ Project: *New CMOS Voltage Controlled Floating and Grounded Resistors.*
- ◆ Supervisor: Prof. Dr. Ahmed M. Soliman

M.Sc. Electronics and Communications Dept. Nov. 1996

- ◆ University: **Cairo University**
- ◆ Faculty: Faculty of Engineering
- ◆ Major: Microelectronics Circuit Design
- ◆ Duration: 1994-1996
- ◆ Title: *New Building Blocks for Analog Signal Processing in MOS Technology.*
- ◆ Appreciation: Distinction in post graduate courses.
- ◆ GPA: 3.9/4
- ◆ Rank: 1/20
- ◆ M.Sc. score: 96%
- ◆ Supervisor: Prof. Dr. Ahmed M. Soliman

Ph.D. Electronics and Communications Dept. April 1999

- ◆ University: **Cairo University**
- ◆ Faculty: Faculty of Engineering
- ◆ Major: Microelectronics Circuit Design
- ◆ Duration: 1997-1999
- ◆ Title: *Low Voltage Analog VLSI Circuits*
- ◆ Supervisor: Prof. Dr. Ahmed M. Soliman

3. Academic Ranks and Teaching Experience

Academic Rank	Date of obtaining Rank			Name of University Granting Rank	Location/Country	Number of Years Holding the rank	
	Day	Month	Year			From	To
Assistant Prof.	26	July	2000	Cairo University/ Fayoum Campus	Cairo/Egypt	2000	2005
Associate Prof.	28	Sept.	2005	Cairo University/ Fayoum Campus and GUC	Cairo/Egypt	2005	2010
Professor	27	Oct.	2010	Cairo University/ Fayoum Campus and GUC	Cairo/Egypt	2010	Present
Professor	17	July	2016	University Of Sharjah, UAE	Sharjah?UAE	2016	Present

Faculty of Engineering - Cairo University - Fayoum Branch-Egypt (1999-2005)

Faculty of Engineering - Fayoum University - Fayoum -Egypt (1999- Present)

Faculty of Engineering – German University in Cairo (GUC)- Egypt (2006-2010)

Faculty of Engineering – Sharjah University – Sharjah, UAE (2010- Present)

◆ Teaching Lectures for:

Electronics I	1 st year students
Electronics II	2 nd year students
Electronics III	3 rd year students
Digital Electronics	4 th year students
Selected Topic in Integrated system	4 th year students
◆ Analog VLSI Circuits	
Analog-Modulation Communications Systems	3 rd year students
Digital- Modulation Communications Systems	3 rd year students
Information Theory and Channel Coding	4 th year students
Selected Topic in Communications Systems	4 th year students
◆ Optical Fiber Communication	
◆ Satellite Communication	
◆ Mobile Communication	
◆ Spread Spectrum Communication	
Electric Circuit I	1 st year students
Electric Circuit II	2 nd year students
Active Circuits	3 rd year students
Electromagnetic I and II	2 nd year students
Electromagnetic III	3 rd year students
Electromagnetic IV	4 th year students
Logic Design	1 st year students
Microprocessors	2 nd year students

♦ **Developing laboratory experiments and laboratory manuals for:**

Electronics

4th year students

Communication

4th year students

♦ **Supervising graduation projects for 4th year students:**

For Example

♦ **Hand Held Calling System:**

The project consists of two major parts, the first is the handheld where the user can write a message of 80 characters with all letters, numbers and symbols, all editing functions (select, copy, cut, paste and delete), scrolling and writing new message are available, then by pressing "send" button, this message can be sent to PC or the large display unit or both. The large display unit is about 1m*20cm, so as to enable any number of people to read the message.

♦ **Participating in designing the curricula and defining course syllabi for the Electrical Engineering Department, Cairo University-Fayoum Branch**

4. Teaching Statement:

There are many ways in which a teacher can impart a better conceptual understanding of Electronic Communication Systems. One of the most important is to first attract their interest by designing circuits which are relevant to the particular interest of the students in the class. I often use examples from my expertise in applied microelectronics to convey and elicit enthusiasm. For example, in Electronics III course, I teach not only the theory of analog and digital circuit design but also how we can use this theory in implementing several projects such as microcontroller based application like light control system, digital clock, handheld calling system, moving message display units, air condition controller and queuing system. Another relevant example occurs in Electronics IV course, when demonstrating the design of microprocessor using digital building blocks, I make a project divided among my students as CPU part, control unit part, and memory part and I/O interface. These examples naturally lead to the use of CAD tools in the classroom, such as SPICE, Matlab and Ledit layout tool.

♦ **Interested Subjects, I would like to teach the following subjects :**

1. Analog and Digital Microelectronics Circuits and Systems.
2. Passive and Active Electric Circuits.
3. Analog and Digital Modulation Systems.
4. Information Theory and Channel Coding.
5. Electromagnetic Fields and waves.
6. Digital Logic Design and Microprocessors.

♦ **Teaching Method**

While teaching, I use computer based presentation (e.g. power point). I use the board when detailed explanation is needed (e.g., more problems to solve). As a picture worth a thousand words, it is essential to draw pictures and diagrams when explaining certain concepts.

Various course materials(e.g., notes, assignments , etc) are posted to the course book or homepage for easy access by students.

By doing so, the lecture is more alluring and time preserved for the instructor to cover more concepts and solve more problems. Moreover, students are no longer worried about copying the notes, but are more focused on understanding the material presented. This gives students more chance to ask questions during the class period.

5. Research Area

- ◆ Mixed-mode Analog VLSI
- ◆ Low-voltage low-power designs
- ◆ Application Specific Integrated Circuits (ASIC) design
- ◆ Design of high frequency filters using MOS transconductors

6. Research Statement:

My research is on fully integrated analog filters, high frequency transconductance amplifiers, low voltage mixed mode CMOS circuit design and design of very large scale integrated circuits applications (VLSI).

The main objective of my thesis work in my PhD is on the design of low voltage high performance building blocks suitable for VLSI applications. I have been proposed the first CMOS realization operating under low voltage operation of the current feedback op-amp both in single and fully differential forms.

7. Industrial Experience

- Design, build and support innovative and reliable Electronic based communication systems.
- Listen to and interpret customer requirements.
- Build robust microcontrollers - based application.
- Follow best practice methodologies for development and documentation
- Build relationships at all levels with customers, suppliers and colleagues
- Contribute to the training and development function.

8. Project Management Experience

- Jointly responsible for all business planning, development and management activities for a startup specializing in PC and network support. I am a member in the management team of Integrated University Management System, the objective of this project is the automation all the university processes in the Fayoum Branch of Cairo university.
- Wrote project proposals and functional specifications for all projects developed by the faculty, both internally and for its clients.

9. Computer Skills

- ◆ Operating Systems: DOS, Windows, UNIX, Linux.
- ◆ Computer languages: C, C++, Visual Basic, Assembly
- ◆ Simulations tools: PSpice, Logic Designer, MATLAB
- ◆ Tools: PowerPoint, Winword, Scientific Word

10. Languages

- ◆ Arabic: Mother tongue
- ◆ English: Fluent (reading, writing and speaking)

11. Publications

(I). Refereed Books

1. Eman Soliman and Soliman Mahmoud, Design of The Differential Difference Operational Floating Amplifier, ISBN 978-3-639-17849-4, VDM publisher. **2009**

(IV). Research projects

Project ID: “648”

Project Type: “**German Egyptian Research Fund Grant**”

Project Title:” **Design of CMOS field programmable analog arrays and its applications**”

Principal Investigator: **Prof. Soliman Awad Mahmoud**

I have received “The German-Egyptian Research Fund” Grant. The German-Egyptian Research Fund is part of the long-standing partnership between the Arab Republic of Egypt and the Federal Republic of Germany in the fields of science and technology, the Ministry of Higher Education and Scientific Research of the Arab Republic of Egypt (MHESR) and the Federal Ministry of Education and Research (BMBF) have agreed to issue this joint call for proposals for innovative, application-oriented research projects. This grant are intended to give researchers– including young scientists- an opportunity to address new areas of scientific research and to promote bilateral research cooperation between the two countries in areas of mutual interest. The Grant will be used to finance the project “Design of CMOS Field Programmable Analog Array and its Applications”. The project will be carried out in collaboration with Ulm Microelectronics Institute under supervision of Prof. Dr. Ing. Maurits Ortmanns and Dipl. Ing. Joachim Becker.

(V). Dissertations and Theses Directed

PhD Theses Completed

1. Low-Voltage Current-Mode CMOS Building Blocks for Field Programmable Analog Arrays and Applications; Ahmed Madian; Cairo University; Egypt, 2006.
2. Design of CMOS Programmable Current Mode Building Blocks and Field Programmable Analog Arrays; Eman Soliman; German University in Cairo; Egypt, 2012.

MSc. Theses Completed

1. Digitally Controlled CMOS Analog Building Blocks Using New Current Division Networks, Mohamed Ahmed Hassan; Cairo University; Egypt, 2004.
2. Differential and Single-Ended Low Voltage CMOS Current Conveyors and their Mixed-Mode Applications for Analog Signal Processing, Tarek Mohamed Hassan, German University in Cairo, Egypt, 2006.
3. Differential Difference Operational Floating Amplifier: New CMOS realizations and Applications, Eman Ahmed Soliman, German University in Cairo, Egypt, 2008.
4. Modeling of Active Compensated KHN Band Pass Filter Using Standard Hardware Description, Rasha E. Elqueseny, Ain Shames University, 2009.
5. Modeling and Simulation of Photovoltaic Modules, Heba Nadhmi Mohamed, University of Sharjah, UAE, 2013.
6. On the Design of Low Power CMOS (SA-ADCs) for Biomedical Applications, Tasnim Bassam Nazzal, University of Sharjah, UAE, 2016.
7. CMOS Digitally Programmable Analog Front-End for EEG Detection System, Aisha Alhamadi, University of Sharjah, UAE, 2016.
8. Design of a Highly Linear CMOS Programmable Transconductor Circuit and Its Applications in Biomedical Systems and Multi-Standard Receivers, Mohamed Balla Elamien, University of Sharjah, UAE, 2017.

Senior Design Research Projects

1. Wheelchair Controlled by Tongue Derive System, Meera Abdallah, Mariam Mohammed, and Muhra Ahmed, University of Sharjah, UAE 2016-2017.
2. Restoring Function in Paralyzed Limbs Using EEG, Maha Samir Diab and Zainab Husain, University of Sharjah, UAE 2015-2016.
3. Smart Wearable Obstacle Detection Glasses for Low-Vision People, Noora Ahli, Hamadah AlJassmi and Hamda Alahmed, University of Sharjah, UAE 2015-2016.
4. Design and Implementation of an active electronic circuit chain for detecting EMG signal, Khawla Abdulla, Latifa Nasser, and Manal Saif, University of Sharjah, UAE 2015-2016.
5. Low noise low power instrumentation amplifier for biomedical application, Mohamed Balla El amien, Abdulrahman Zaatari, and Mohamed ElTinai, University of Sharjah, UAE 2014-2015.
6. Design and Implementation of a Robust Electronic Read-out Circuit Chain for Monitoring and Processing of an EEG Signal, Amal AbdulAziz, Bushra Alhendi, and Saarah Abdulla, University of Sharjah, UAE 2014-2015.
7. Successive Approximation ADC for ECG, Heba Bilal and Hind Essa, University of Sharjah, UAE 2013-2014.
8. Variable Gain Amplifier for ECG, Ameera Al Hayyas, Mariam Al Hmoudi, and Khadija Abdulla, University of Sharjah, UAE 2013-2014.
9. Baby Safe Sleep Monitoring System, Sara Alnaqbi, Amna Alabdalla and Azeeza Alhammadi, University of Sharjah, UAE 2013-2014.
10. Differential Voltage Current Conveyor (DVCC) CMOS Discrete-Integrated Realization and its Applications in Realizing VGA, Filters and dual slope square/ triangular wave generator, Alya Mohammed Salem, Budoor Redha Makki and Hamda Ali Hassan, University of Sharjah, UAE 2013-2014.
11. Noise-Shaping Gain-Filtering Techniques For Wireless Applications, Aisha Abdallah and Sara Khalid, University of Sharjah, UAE 2012-2013.
12. Digitally Programmable OTA-C Low Pass Filter For Portable ECG Detection Systems, Ahmed Bamakhramah and Saeed A. Al-Tunaiji, University of Sharjah, UAE 2012-2013.
13. MATLAB/PSpice Hybrid Simulation Modeling of a Photovoltaic System and Its Applications, Mejd M. Alsari, Esra I. Reda, and Ruqiyah M. Alhammadi, University of Sharjah, UAE 2012-2013.
14. A CMOS Complex Filter for Bluetooth with Gain Tuning, Sumayya Almazroei, Noor ul Misbah and Shamma Banihammad, University of Sharjah, UAE 2011-2012.
15. Low Power FPAA Design Based on OTA Using 90nm CMOS technology, K. Ali, A. Amgad, M. Rabea, A. Adel, A. Nasser, H. Mohamed and Y. Ismail Soliman, Fayoum University, Egypt 2010.
16. Cascaded Third-order Tunable Low-Pass Filter using Low Voltage Low Power OTA, Sondos Ismail, Germany University in Cairo (GUC), Egypt 2010.
17. High Frequency Tow-Thomas Tunable Filter using OTA based voltage op-amp, Walid Zemouri, Germany University in Cairo (GUC), Egypt 2010.
18. High Bandwidth Second Generation Current Conveyor based Operational Transconductance Amplifier, Mai M. Kamel, Germany University in Cairo (GUC), Egypt 2010.
19. Different Baseband Chain Architectures for Multi-standard Reconfigurable Receivers, M. A. Dawoud, Germany University in Cairo (GUC), Egypt 2009.
20. Reconfigurable Baseband Chain for Software-Defined Radio Receivers T. El-Zomor, Germany University in Cairo (GUC), Egypt 2009.
21. Sixth Order Baseband Variable LPF Using New Tunable Operational Amplifier, S. M. Fahmy, Germany University in Cairo (GUC), Egypt 2009.
22. High Frequency OTA-C Filters with Current and Voltage Transfer Functions based on Multiple Loop Feedback Technique, M. ElGuindy, Germany University in Cairo (GUC), Egypt 2009.

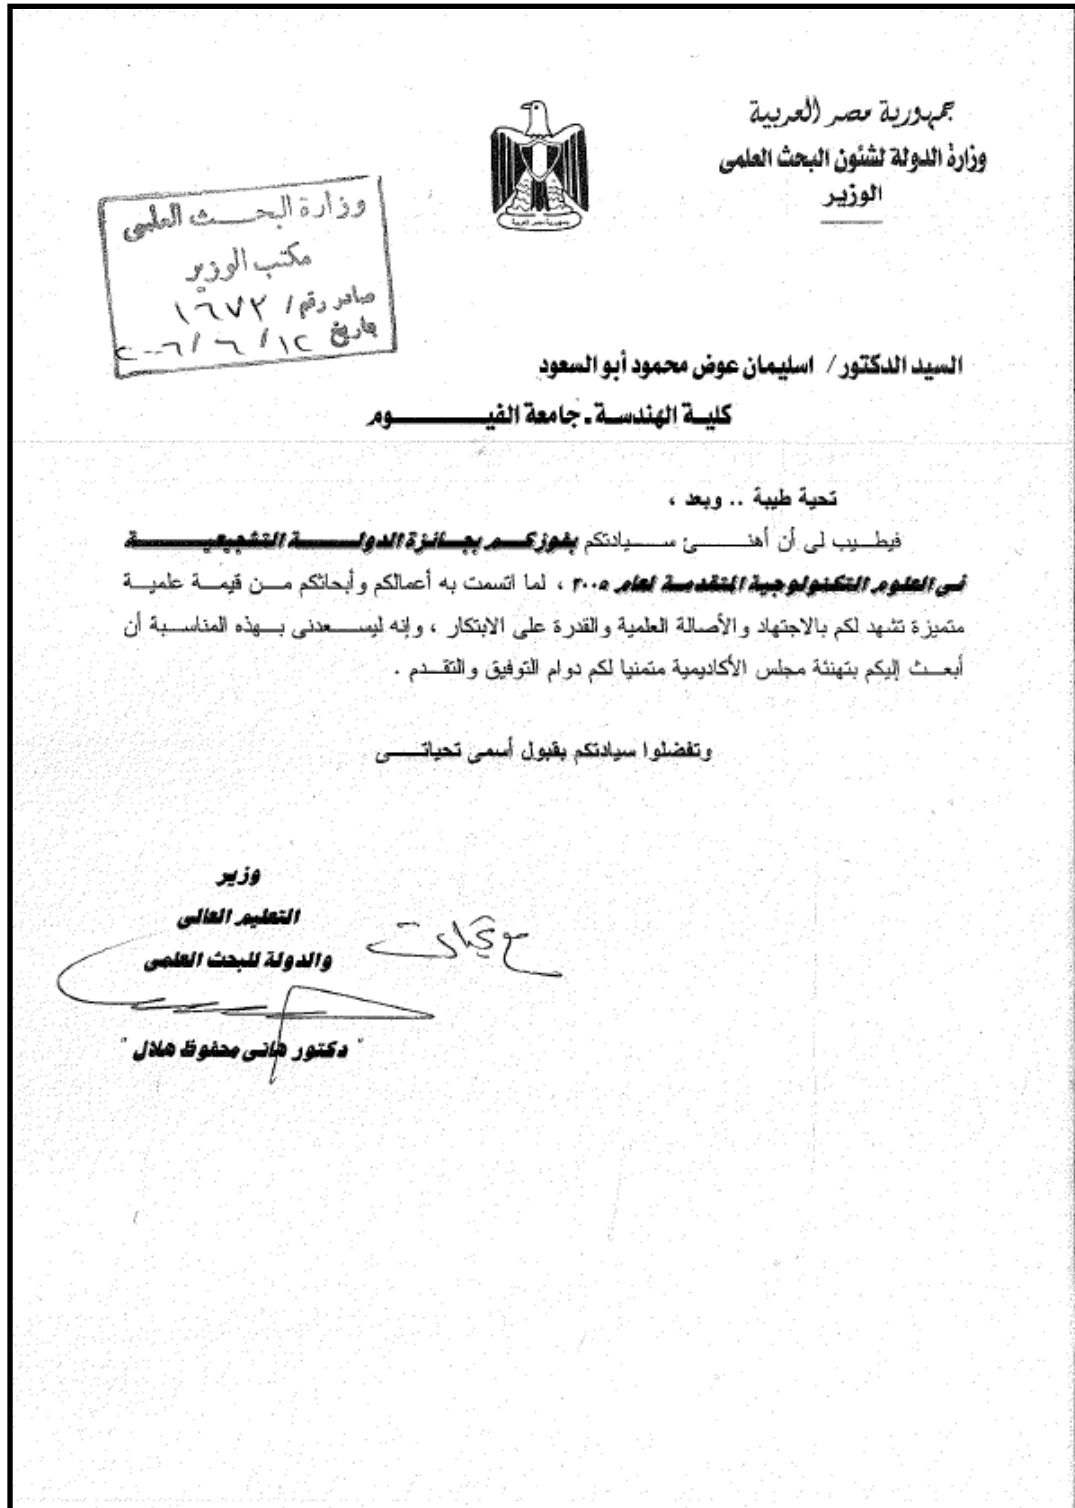

23. Design of Switched Capacitor Biquad Filter with Quality Factor Tenability, K. A. Al-Badawy, Germany University in Cairo (GUC), Egypt 2009.
24. Low voltage, low power CMOS Front-end for Bluetooth Applications, O.M. Kassam, Germany University in Cairo (GUC), Egypt 2008.
25. A CMOS Complex Gm – C Filter for Low-IF Bluetooth Receiver, M.M. Fahmy, Germany University in Cairo (GUC), Egypt 2008.
26. Fully Programmable CMOS Triangular and Trapezoidal function Generators, A. N. Taher, Germany University in Cairo (GUC), Egypt 2008.
27. New Switched Capacitor Biquad Filter Using Current feedback Amplifier, M. F. Nouraldin, Germany University in Cairo (GUC), Egypt 2007.
28. Low voltage DC-DC Converter Controller Based on CMOS Rail- to- Rail Second Generation Current Conveyor, A. A. Soliman, Germany University in Cairo (GUC), Egypt 2007.
29. 3V CMOS Rail to Rail Op-amp K.M. Abdel Moneim, Germany University in Cairo (GUC), Egypt 2007.

(VI).Professional Activities (Technical Committees)

- Senior member IEEE
- IEEE UOS University student branch counselor 2015-2017
- Review Committee Member, IEEE Journal of Solid State Circuits.
- Review Committee Member, IEEE Transactions on CAS I & II.
- Review Committee Member, International Journal on Circuits, Systems and Computers (JCSC).
- Review Committee Member, Journal on Circuits, Systems and signal processing.
- Review Committee Member, IEEE VLSI transactions
- Review Committee Member, Microelectronics Journal.
- Review Committee Member, Analog Integrated circuits
- Review Committee Member, Electronics letters
- Permanent Review Committee Member, IEEE International Symposium on Circuits & Systems ISCAS.
- Permanent Review Committee Member, IEEE International Midwest Symposium on Circuits and Systems, MWCAS

12. Prizes

- ◆ The Distinguished research award for the year 2014-2015 from University of Sharjah, UAE.
- ◆ The Distinguished research award for the year 2011-2012 from University of Sharjah, UAE.
- ◆ Science Prize of Advanced Engineering Technologies from Scientific Research Academy- Egypt (2005).
- ◆ The best teaching staff for 2005 and 2006 years from Electrical Engineering Department, Faculty of Engineering, Fayoum University.

شكر و تقدير

تشهد جامعة الشارقة أن

د. سليمان محمود _ كلية الهندسة

قد فاز بجائزة جامعة الشارقة التشجيعية السنوية لأعضاء هيئة التدريس

في مجال البحث العلمي (2011 - 2012)

متمنين له مزيدا من التقدم و العطاء

أ. د. سامي عبد الحميد محمود
مدير الجامعة

شهادة تقدير

عيد العلم الرابع
ديسمبر ٢٠١١

يسر أسرة جامعة الفيوم أن تتقدم بخالص التهنية

إلى السيد د. سليمان عوض محمود - كلية الهندسة،

لحصوله على / جائزة جامعة الفيوم للنشر العلمي لعام ٢٠١١

داعين الله ان ينفع بكم مصرنا الغالية

رئيس الجامعة

أ.د. عبد الحميد عبد التواب صبرى

شهادة تقدير

عيد العلم الخامس
ديسمبر ٢٠١٢

يسر أسرة جامعة الفيوم أن تتقدم بخالص التهنئة
إلى السيد / د. سليمان عيسى محمود الأستاذ بقطاع الهندسة
لحصوله على / جائزة جامعة الفيوم في النشر العلمي ٢٠١٢
داعين الله أن ينفع بكم مصرنا الغالية

رئيس الجامعة

أ.د. عبد الحميد عبد التواب صبرى

K.P

شهادة تقدير

عيد العلم السادس
ديسمبر ٢٠١٣

يسر أسرة جامعة الفيوم أن تتقدم بخالص التهنئة
إلى السيد / د. سليمان عيسى محمود
لحصوله على / جائزة جامعة الفيوم في النشر العلمي
داعين الله أن ينفع بكم مصرنا الغالية

رئيس الجامعة

أ.د. عبد الحميد عبد التواب صبرى

K.P

شهادة تقديري

تشهد جامعة الشارقة أن

د. سليمان محمود

قد فاز بجائزة جامعة الشارقة الشجعية السنوية لأعضاء هيئة التدريس المتميزين في مجال

البحث العلمي (٢٠١٤-٢٠١٥)

أ.د. حميد مجول النعيمي
مدير الجامعة

متمنين له مزيداً من التقدم والعطاء.

13. Professional Activity

♦ Chairman of the Electrical Engineering Department- Faculty of Engineering- Fayoum University from 1/9/2007 till 30/1/2010.
