

PHYSIOTHERAPY SUPPLEMENTARY LAB (W12-203)

INTRODUCTION

Currently, this relatively small room contains few equipment and is used as a supplementary lab for labs 204/224 and 209, especially when separation of female and male students for application of practical skills is needed.

EQUIPMENT AND INSTRUMENTS

- Quadriceps bench
- Finger Ladder, Shoulder Wheel
- Different Types of Beds (Tilting Table, Manual Therapy Beds)
- Arm & leg cycle machine
- Traction bed
- Treadmill Biodex machine
- Some measurement and assessment tools.

EXPERIMENTS

This lab is used for some practical sessions when separation between male and females during practical application is needed.
